Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/502,262	Applicant(s) SCHULTHEIS ET AL.	
	Examiner EDMUND H. LEE	Art Unit 1732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 11 and 20 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Base independent claim 1 recites a holding element.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "wherein the molded body...into a molding tool" (cl 1, lns 2-3) is confusing because it is idiomatically incorrect.

The phrase "formed on then partially" (cl 1, ln 20) is indefinite because it is idiomatically incorrect.

Claims 4-20 are indefinite because it contains indefinite "preferably" phrases that make the metes and bounds of the claim unascertainable.

Correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1732

4. Claims 1,12,18,19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Amano (USPN 4963413). Amano teaches the claimed process as evidenced at col 1, lns 15-61; and figs 4-5.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2,3,4,5,6,7,8,9,10,11,13,14,15,16,and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Amano (USPN 4963413). The above teachings of Amano are incorporated hereinafter. In regard to claim 2, Amano teaches using an adhesive but does not teach using it in tape form. Adhesive tapes are well-known in the molding art for its ease of use. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the adhesive of Amano in tape form in order to facilitate its application to the glass plate. In regard to claim 3, such is taught by Amano (col 1, lns 15-61; and figs 4-5). In regard to claims 4-8 and 13-17, the use of specific material is a mere obvious matter of choice dependent on the desired final product and of little patentable consequence to the claimed process since it is not a manipulative feature or step of the claimed process. Further, the claimed materials are well-known in the molding art. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed materials in the process of Amano in order to form a glass plate having good sealing and holding properties. In

regard to claims 9-11, such limitations are taught by Amano (col 1, Ins 15-61; and figs 4-5).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following US patents teach the state of the art:

4996808, 5316829, 5069852, 4915395, 4999147, and 4543283.
